

I'm Still Waiting

© 2015 Will Stanley

You said, "be patient, and your time will surely come."
So I sat back, relaxed and stopped being glum.
But years went by, and I'm still just getting crumbs.
I'm not berating
But I'm still waiting

Did you really say that I had what it takes
That you'd make sure that I finally got the breaks
Was B R A K E S the way that you spelled brakes
May be irritating
But I'm still waiting.

Once upon a time I was young and full of hope
I didn't sit around and mope
Life spread out before me, full of possibilities
Just sitting there for me to seize.

Why did you fill my head with tales of fame and wealth
Saying I would make it big with the hand that I was dealt
Now I have to say this is the worst I've ever felt
It may seem grating
But I'm still waiting

Once upon a time when I believed the world was fair
And I approached my life without a care
Now I know your BS won't help me get ahead
Everything is up to me instead.

Instrumental

Now is the time for me spread my wings
To tune my guitar and start to sing
No more sitting here contemplating
Thinking life's frustrating,

And no more waiting.
No more waiting.
I'm still waiting.
I'm still waiting.
