

# **It's Just Love**

© 2005 Will Stanley

We take a walk straight down Main Street  
We get such stares from the people we meet  
They all wonder what we've got  
Some secret potion, or some magic shot  
But it's really more basic  
When I explain they think I'm being evasive  
But when I tell 'em straight they shrug  
It's just love.

It may not be scientific  
But when you feel it, it's truly terrific  
You bask all day in a warm glow  
The aura's around you wherever you go  
It doesn't glimmer like crystal  
You can't make a batch by boiling newt's toes with thistle  
But it engulfs you like a hug  
It's just love.

It may be what makes the world go round  
Cuz without it, where would we be  
Just a song without a single sound  
Or a walk without you next to me.

Instrumental

It's really something  
Sweeter than wine or an apple dumpling  
It's life's most effective drug  
It's just love.
